- Data Structures
- DBMS
- Systems Programming
- Operating System
- Internet Technology
- Networking

Projects

Portfolio Website | HTML, CSS, JavaScript, React.js

January 2025

- Designed and developed a personal portfolio website to showcase projects and skills.
- Employed responsive design principles to ensure seamless performance across mobile and desktop devices.
- Implemented JavaScript features, such as an interactive project gallery and contact form.

Gmail Unsubscriber Tool | JavaScript, Google Apps Script

May 2024

- Built a Gmail automation script using Google Apps Script to unsubscribe from unwanted promotional emails.
- Parsed inbox messages to identify and extract unsubscribe links, executing requests automatically.
- Utilized the Gmail API in Google Apps Script to batch process emails, ensuring efficient inbox management.
- Scheduled the script to run periodically, maintaining a clutter-free inbox with minimal manual intervention.

Interactive Job Application Tracker | HTML, CSS, JavaScript, LocalStorage API

July 2023

- Created a web application to track job applications, including statuses, deadlines, and company details.
- Designed an intuitive interface with HTML and CSS to enhance user experience.
- Utilized JavaScript and LocalStorage API to store data locally, ensuring offline functionality.
- Added features like progress tracking and reminders for upcoming interview dates.
